About Lodestar Minerals

Lodestar Minerals Limited is a Perth-based explorer with projects in the Peak Hill and Kimberley regions of Western Australia. Lodestar acquired the Peak Hill-Doolgunna project in March 2010. The Peak Hill-Doolgunna project forms the core of Lodestar's project portfolio and represents a strategic landholding of 2300 square kilometres covering 120 kilometres of the Jenkin Thrust Belt, a regional fault system that is adjacent to the DeGrussa Cu-Au deposit. Lodestar believes the region has potential to host a number of styles of base metal deposit and is embarking on an aggressive exploration program to assess the potential of the under-explored north Murchison base metal province.
